

FOR IMMEDIATE RELEASE

DATASERV ANNOUNCES THE RELOCATION OF ITS CORPORATE HEADQUARTERS

St. Louis, MO – April 30th, 2010 – [DataServ](#) recently completed construction and moved its corporate headquarters into a new space in St. Louis, Missouri, where the business has been based for 16 years. The move gives the document and process automation company a much improved workflow for its 50+ employees, with more efficient use of space along with enhanced collaboration areas for all employees. In the previous office space, departments were spread out in a couple of suites and on two separate floors of the building. With the move, DataServ was able to create a new layout combining all departments under one roof, with plenty of room for expansion.

Jeff Haller, DataServ Managing Partner, commented on his company's decision to relocate, stating, "The end of our lease was approaching and it made good economic sense to see what opportunities might be available in the commercial real estate market. St. Louis is a great place for corporate headquarters and we are very happy with the terms we received for the new space."

The company will be hosting an open house on Wednesday, May 12th, 4:00pm (CST) – 6:00pm (CST) to allow clients, new prospects, partners and friends to tour the new office and learn more about Software as a Service (SaaS) for AP, AR and HR process automation that DataServ has provided for its clients worldwide since 1994.
