

FOR IMMEDIATE RELEASE

## DATASERV FORMS BUSINESS PARTNERSHIP WITH CLOUD COMMERCE

---

**St. Louis, MO – June 29<sup>th</sup>, 2010** – Document and process automation SaaS provider, [DataServ](#), announces a new business partnership with Cloud Commerce, a St. Louis-based provider of cloud computing solutions for business. Under this partnership agreement Cloud Commerce will market DataServ's SaaS solutions for Accounts Payable, Accounts Receivable and Human Resources document and workflow automation.

"Partnering with companies that understand the economic value offered by [SaaS applications](#) versus the high cost of traditional software is a constant goal of ours," states Jeff Mann, Director of Marketing for DataServ. "Cloud Commerce is a great business partner because they offer a consolidated set of cloud services. DataServ's SaaS AP, AR and HR solutions have been built and refined over our 16 year history and are perfect products for a company like Cloud Commerce to market."

"DataServ solutions deliver all the benefits of document and data capture, imaging, workflow, electronic report management, storage and retention management with none of the infrastructure, overhead or expense of traditional software because it is cloud-based Software as a Service (SaaS)," said Greg Altin founder and partner of Cloud Commerce. "We can quickly deploy their solutions so an organization can begin realizing the benefits and value immediately."

### About DataServ

Established in 1994 and located in St. Louis, Missouri, USA, DataServ is a SaaS provider of document and process automation solutions. Their solutions provided to companies worldwide streamline and lower costs within [Accounts Payable](#), [Accounts Receivable](#) and [Human Resources](#) functions by eliminating paper and automating processes.
